Summary

Python Developer with hands-on experience in Django, REST APIs, PostgreSQL, Linux, debugging, testing, and backend development through internships and academic projects. Built database-driven applications, wrote Python automation helpers, improved backend performance, and supported structured testing workflows in collaborative development environments.

Skills

Languages: Python, C++, JavaScript, SQL, HTML, CSS
Frameworks and Libraries: Django, Flask, React.js, Node.js, Express.js, Scikit-learn, Bootstrap, Tailwind CSS
Databases and Tools: PostgreSQL, MySQL, Git, GitHub, Linux, Docker, REST APIs, Wireshark, Burp Suite, Metasploit, JIRA
Core Concepts: Object-Oriented Programming, Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, System Testing, Debugging, Automation, Web Security

Experience

Perpex **Aug 2025 – Nov 2025**
Django Developer Intern *Remote*

- Developed and maintained 8+ Python and Django backend modules for authentication, employee records, and API-driven workflows, improving feature delivery speed by 25%.
- Built, tested, and debugged 10+ REST API endpoints with PostgreSQL integration, reducing backend defects by 30% during internal testing.
- Optimized SQL queries and server-side business logic, lowering average response time by 20% across key application flows.
- Collaborated through Git-based development workflows to review changes, fix bugs, and deliver sprint tasks on schedule.

C-DAC, Noida **Jun 2025 – Jul 2025**
Cybersecurity Intern *Noida, India*

- Performed system testing and vulnerability assessment across 12+ web application modules using Linux-based security and network analysis tools.
- Wrote Python helper scripts to organize scan logs and test outputs, reducing manual analysis effort by 35%.
- Analyzed network traffic and debugged application-level issues using Wireshark and Burp Suite, identifying 15+ security findings for remediation.
- Documented defects, reproduced issues, and supported verification of fixes through structured testing and technical reporting.

Projects

Smart-Kissan — Python, Django, Scikit-learn **Nov 2025 – Mar 2026**

- Built an AI-based crop recommendation platform that predicts suitable crops from soil inputs such as NPK values and pH.
- Integrated a Random Forest model with 95%+ testing accuracy and connected it to a Django web interface for real-time predictions.
- **Live:** smart-kissan.onrender.com **GitHub:** github.com/rishirajdas05/Smart-Kissan

NexForce Employee Management System — Django, PostgreSQL **Jan 2026 – Apr 2026**

- Developed a centralized employee management system with CRUD operations, filtering, authentication, and role-based access control.
- Designed secure PostgreSQL-backed workflows for employee records, attendance, payroll processes, and administrative operations.
- **Live:** nexforce-ems.onrender.com **GitHub:** github.com/rishirajdas05/NexForce

Education

Madhav Institute of Technology and Science **Expected Aug 2027**
Bachelor of Technology in Information Technology *CGPA: 7.38/10*

Certifications and Achievements

- AI/ML for Geodata Analysis, ISRO/IIRS
- Cybersecurity Fundamentals
- Solved 150+ LeetCode problems; participated in CodeChef and Codeforces contests
- Qualified JEE Main and JEE Advanced; State Youth Parliament Finalist
